

Gefen DVI Booster EXT-DVI-141B

Easy Digital Video Extension up to 100-Feet

Ever tried to extend a DVI display beyond its 15-foot distance limitation (as per the DVI specification) using just a copper-based DVI cable - It's likely you saw some sparkles when you connected it at high resolutions. It's great for a nighttime sky but hardly ideal for your beautiful HD display.

Gefen's DVI Boosters make it all better by reconditioning the HD signal sent over the long cable, essentially eliminating the video degradation that occurs beyond 15-feet.

A sort of cable companion, the DVI Booster requires no extra power supply, additional wiring or sender and receiver system. It's an inconspicuous single box solution that makes extending HDTV over copper cables a breeze.

Resolutions up to 1080p or 1920x1200 guaranteed up to 100 feet.

Gefen's family of Boosters include various hard working little boxes that make HDTV extension through a long cable easy and effective. They are limited in distance at the highest resolutions up to 200 feet.

To go beyond the limited inherent DVI distance or if you'd like to use two or more cables, our Boosters are a perfect option. They replicate digital video signals, enabling you to 'daisy chain' cables and Repeaters as far as you need to go.

How it works

This plug and play installation takes mere seconds. You simply connect the extension cable on one side of the DVI Booster and the display's cable on the other side. The DVI Booster sits between the end of your DVI cable and your display. You also have the option of connecting another DVI cable to the Booster, daisy chaining Boosters and cables for greater distances.

Note: The DVI Booster is HDCP pass-through.

Package Includes:

- * DVI Booster
- * User's Manual

Features:

- * Perfects digital video sent over long stretches of DVI cables
- * Extends DVI displays away up to 100 feet from the source
- * Supports resolutions up to 1080p, 2K, and 1920 x 1200
- * Supports DDWG standards for DVI compliant monitors
- * HDCP compliant

Specifications:

- * Digital Video Amplifier Bandwidth: 165 MHz
- * Input Video Signal: 1.2 Volts p-p
- * DVI Connector: DVI-I 29 pin female (supports digital signals only)
- * Dimensions: 1.75"W x 1"H x 1.875"D
- * Shipping Weight: 1 Lbs.
